

Password Strength Checker Policy:

The password checker uses a minimum length of 8 characters and evaluates uppercase letters, lowercase letters, numbers, and approved special characters. Passwords that meet the minimum length and all four-character requirements are rated Strong. Passwords that meet the minimum length and three of the four-character requirements are rated Medium. All other passwords are rated Weak. The program also provides suggestions for any failed requirements.

- Minimum length: 8 characters
- 4-character checks: uppercase, lowercase, number, approved special character
- Strong: minimum length met + 4 out of 4-character checks
- Medium: minimum length met + 3 out of 4-character checks
- Weak: anything below those requirements
- Suggestions appear for failed requirements
